

Studley Entaco Green Report July, August & September 2021

Fri 2nd July

Cut the green with Mike V assistance. Reduced the height of cut 0.25 mm and engaged the groomer, after cutting applied "Intrench" followed up with "Go Green" treatments.

Sat 10th July

Cut the green reduced the height of cut to 4.25mm, engaged the groomer but after a short time the groomer stopped working.

Tue 13th July

Phil Taylor from Tallis Amos called to look at our green maintenance equipment, he reset the mower blades as they should be and gave good advice about setting the mower and explained the services his company could offer.

Fri 16th July

Cut the green with Mike V help.

Went over the green with the sorrel roller and then treated the green with "Aquasorb" and "Fossil". Mower cutting much better after Phil Taylor adjusted the cutters.

Fri 6th Aug

After cutting the green applied "Intrench" followed up with "GoGreen".

Fri 20th Aug

Asked John Mullins to call in today to look at the green and talk about materials for the end of season work. J.M confirmed we have "Take All patch" on the usual area of the green.

After cutting the green sprayed with "Heratige" and then "Magflow 300" to combat the problem of "Take All Patch"

Mon 27th Sep

Scarified the green, working party of members helped clearing up the debris left by scarifying and also clearing out the ditches round the green and putting the covers in the ditches. Covers put on the benches and benches that need treating bought into the club house.

Top Dressing delivered.

Tue 28th Sep

Aerated the green with the pencil tines.

Spread grass seed and then went over the green with the light brush.

Wed 29th Sep

Split the green into two and then applied "Marathon T.C.R".

Set out the green with the string lines ready for the top dressing.

Fri 1st Oct

Over-seeded and then distributed the bags of top dressing then spread them over the green and worked it in to the green.

Several members turned up to help much appreciated.
