

Studley Entaco Green Report October November 2021

Fri 15 October

Whipped over the green to remove worm casts.

Wed 20 Oct

Went over the green with the heavy brush to remove dew.
Reset cutting height of mower to 8mm and cut the green.

Small amount of bird damage but nothing to be concerned about.

Wed 27 Oct

Went over the green with the whip to remove worm casts.
Went over the green with the light brush to remove dew.
Cut the green height of cut 8mm.
Decided the green needed spraying with Heritage to combat Fuserium, started spraying the first section but the sprayer stopped working. Removed the switch and took it home to test with a meeter.

Thu 28 Oct

Switch to sprayer O.K. refitted cables but sprayer still not working, visually checked to see if anything was obviously wrong to no avail. Called Mike Bell and explained the situation, Mike came to site to investigate. After much testing and changing fuses unable to determine what was wrong so decided to call in an Electrician to look at the machine. (*Sue Birch has friend who is an Electrician so asked her to find out if he could help*).

Tue 2 Nov

Went over the green with the whip to remove worm casts.

Wed 10 Nov

Went over the green with the brush to remove dew and then cut the green, height of cut 8mm.

Wed 17 Nov

Went over the green with the whip to remove worm casts.
Went over the green with the brush to remove the dew.
Removed the pencil tines from the aerator and replaced them with the knife tines and then went over the green with the aerator.
John Mullins came to site to take soil samples, he also confirmed that we do have Fuserium on the green and suggested that at this time of the year with the change of weather Duritas was the best treatment. Ordered the Duritas.
J.M looked over the sprayer and said he would get someone from Vitax (company who make the sprayers) to phone me. Graham Winfield from Vitax did phone me shortly after and talked me through various things and we established the pump was working Graham then suggested we needed an Electrician to check the conductivity of the wiring.

Thu 18 Nov

Dave an Electrician came to look at the sprayer, checked all the connections and found two damaged connectors which he replaced and cleaned off all the others then put everything back together and tested the machine which then worked well.

Tue 23 Nov

Used the sprayer to spray the green with Duritas

Wed 24 Nov

Tallis Amos collected the Dennis Razor mower to take away for servicing.
