

## **Studley Entaco Green Report January 2023**

### **Thu 5<sup>th</sup>**

Met John Mullins (Agrovista Rep) at the club for him to take soil samples. Asked him to order eight bags of Lawn Sand to combat the moss on the green.  
Whipped off the worm casts.

### **Wed 11<sup>th</sup>**

Cut the green with the old mower with a depth of cut set at 8mm.  
John Mullins delivered the Lawn Sand (John picked this up from the depot and delivered it which saved us the delivery costs), had to clear a space in the shed to store the Lawn Sand.  
Green temperature 7°C.  
Dave the Electrification on site installing sensor light switches.

### **Thu 12<sup>th</sup>**

Phoned Tallis Amos and asked when our Dennis Ultra mower would be coming back to site, told me it was ready to be delivered and arranged for it to come back tomorrow between 10:30 and 11:30 am.

### **Fri 13<sup>th</sup>**

Changed the tines on the aerator from the knife tines to the long pencil tines and then aerated the green.  
Green Temperature 7°C

Mower should have been returned today from Tallis Amos, waited until 12:00 for the mower, phoned Tallis Amos asking about the mower. After some investigation they found that it had not been put on the trailer for delivery, Tallis Amos said they would ring next week to rearrange the delivery

### **Mon 16**

Visited the green to look round, what looked to be fox mess on the green, cleared it away, otherwise all o.k.

### **Tue 17<sup>th</sup>**

Phone call from Tallis Amos to arrange for the mower to be delivered tomorrow between 9:00 and 9:30 am.

### **Wed 18<sup>th</sup>**

Tallis Amos returned the Dennis Ultra mower. Started up first pull of the cord and the clutch was much lighter and comfortable to use.  
Green white over with frost.

### **Tue 24<sup>th</sup>**

Visited the green to look round and check on the green. All o.k, green frozen over, tried to get a temperature reading but the instrument too cold to get reading.

### **Mon 30<sup>th</sup>**

Visited the club to check on the green which had now thawed out.  
Green temperature 5°C at 25 mm and 4°C at 150mm, no growth at these temperatures.
