

## Studley Entaco Green Report June 2022

### Mon 6<sup>th</sup>

Changed the cassette in the old mower to the sorrel roller and went over the green before spraying the green with Aquasorb and Fossil.

Used the irrigation system to wash in the treatment.

### Wed 8<sup>th</sup>

Turned the green around.

Sprayed the green with GoGreen and Intrench.

One pass over with the irrigation system to wash in the treatment.

### Fri 10<sup>th</sup> to Fri 17<sup>th</sup>

On Holladay, weather over this week very warm and dry.

### Sat 18<sup>th</sup>

Noted the green looking dry with localised dry patches forming, turned on the irrigation system.

### Tue 21<sup>st</sup>

Turned off the irrigation system. Reports that the system had been running at 08:00am.

### Wed 22<sup>nd</sup>

Bill & Rob unable to cut the green.

Filled in for them and cut the green.

Checked the time clock for the irrigation system, time off day was out so reset it, checked that the clock was set to programme A and that the run time was set for 04:00am. Possible cause for the clock to be out, electrical work had been carried out and the electrical supply had been turned off whilst this work was being done.

### Fri 1<sup>st</sup> June

Checked and reset the cutters on the mower and cut the green with M.V assistance.

John Mullins called in to look over the green, all o.k.

Went round the edges of the green with the strimmer.
