

Studley Entaco Green Report October 2022

Wed 12th

Scarified the green and over-seeded with Mike Bell, Bill McNeish, Peter Holtom and Neil Dallison assistance.

Mon 24th

Started work on the new green edgings.

Wed 26th

Work on the new green edgings Mike Bell, Bill McNeish, Peter Holtom and Neil Dallison all assisting.

One edge complete.

Ordered 12 bags of top dressing from Agrovista via John Mullins.

Mon 31st

Cut the green with 8mm height of cut.

Noted Fusarium has appeared on the green.

Note, have already applied two treatments of Dualitas over the last two months. Spoke to John Mullins who explained the wet warm weather is encouraging the condition and it is rife all over the country. He advised to apply Dualitas again.

Need the green to be reasonably dry and to remain dry for several hours before it can be applied, we do have Dualitas I stock.
